Time to Code

PREPARING CHILDREN FOR A DIGITAL WORLD

www.bitcni.org.uk/timetocode

Time to Code is a volunteering initiative designed to help teach children the basics of IT and coding.

Who is involved?

Time to Code is a partnership between the volunteer, the teacher and their class.

What does it cost?

It doesn't cost you a penny, we just need one hour of your time each week.

Where does it happen?

Either online via a C2K approved platform or in a primary school setting close to your home or place of work.

Why get involved?

Digital technology is growing and changing the way we live and work. Unfortunately, not all children have the same opportunities. By helping local children develop their IT skills at an early age, you will help to raise their aspirations and develop their skills for the future.

How does it work?

We will match you with a local primary school and make all the necessary arrangements. The initial commitment is for one, 8–10-week cycle, with the option to extend. We facilitate training in partnership with Code Club and handle the AccessNI clearance process. All you have to do is turn up and enjoy the sessions.
