Time 2 Count

CAN YOU MAKE THE NUMBERS ADD UP?

www.bitcni.org.uk/time2count

Time 2 Count is a volunteering initiative designed to enhance the numeracy skills of primary school children. It also builds self-confidence and improves social skills.

Who is involved?

You and up to four primary school children selected by the school.

What does it cost?

It doesn't cost you a penny, we just need one hour of your time each week.

Where does it happen?

In a primary school close to your home or place of work.

What does it involve?

One hour each week to play fun maths-based games with a small group of children to help them with their numeracy skills.

Why get involved?

One in six children in Northern Ireland leave primary school with poor numeracy skills. This limits their future potential and has life-long implications. Evidence shows that this type of intervention works. **Personal development** and a **huge sense of achievement** are just two of the personal benefits volunteers experience.

How does it work?

We match you with a local school, who will select up to four pupils, who will best benefit from your support. The initial commitment is for one 8–10-week cycle, with the option to extend. We provide training and handle the AccessNI clearance process. All you have to do is turn up and enjoy the sessions.
